Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A

leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

For a truly comfortable indoor environment and to keep your heating and cooling equipment operating at its peak, Carrier recommends effective air filtration to remove unwanted airborne pollutants from your home. One affordable and convenient option is the EZ Flex™ media filter and cabinet.

Leaders in Technology

Efficiency and Convenience of Cleaner Air

Your home is invaded on a daily basis by airborne pollutants from a number of sources. Pollen, mold spores and more enter through open doors and windows. Your beloved pets shed hair and dander. Even walking across the carpet can kick up an invisible dust storm. As these pollutants build up within your indoor comfort system, performance and efficiency can suffer. Standard, one-inch system filters may provide a small amount of protection, but they just aren't as effective as the EZ Flex system. To ensure cleaner air, optimum airflow and continued peak system performance, the Carrier® EZ Flex media filter and cabinet provide a convenient and affordable solution.

1 Lasting Durability

Built with 20-gauge steel and an attractive, durable powder coat painted finish, our filter cabinet is built to last and is rugged enough to support a 400-pound furnace.

2 Efficient Airflow

Our MERV 10 EZ Flex™ filter effectively traps unwanted particles while allowing smooth, efficient airflow. For an even higher level of filtration efficiency, we offer a MERV 13 filter option as well.

Particle Size	Filter Efficiency	
	MERV 10	MERV 13
3.0 to 10.0 microns	Up to 85%	Up to 90%
1.0 to 3.0 microns	50 - 65%	Up to 90%
0.30 to 1.0 microns		Up to 75%

Notes:
MERV (Minimum Efficiency Reporting Value) – the industry standard for rating filters
Micron: one millionth of a meter or 1/25,400ths of an inch
Shaded area indicates that efficiency is not measured for that rating.

3 Unique Filter Design

The expandable EZ Flex filter is a patented design using a sophisticated manufacturing system that precisely attaches spacing ribbons for optimum performance and low resistance to airflow. The result is effective filtration and continued optimum airflow through your system.

4 EZ Maintenance

A convenient filter change reminder helps you track when filter changes are needed so you can keep enjoying cleaner air and improved system performance. Changing the filter is a breeze as well – simply remove and replace the disposable filter once or twice a year.

Ask about the Infinity® air purifier with patented *Captures & Kills™* technology.

It's About Your Comfort

Today's energy-efficient homes seal in more airborne irritants than ever before. Dust, dirt, pollen and more are circulated throughout your home through the heating and cooling vents. These unwanted particles can settle on your furnishings, pollute the air that you breathe every day and can even restrict airflow and alter performance of your home comfort system. These are some of the reasons why effective air filtration is such an important part of your overall indoor comfort. The Carrier® EZ Flex filter and cabinet can help clear the air while delivering a number of benefits to your indoor furnishings, your home comfort system and more.

While the EZ Flex filtration system is a great choice, for an even higher level of air cleaning, consider a Carrier Air Purifier. Its patented "Captures and Kills" technology is independently proven to deactivate many types of airborne viruses and bacteria, resulting in cleaner air for your home and family.

Limited Warranty

To the original owner, the Carrier EZ Flex cabinet is covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty period. See warranty certificate at carrier.com for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.

Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier's meticulous attention to quality and detail led to a major culture shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it's time to make a choice for your family's comfort, make the best decision you'll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Air Conditioner provides reliable, high-efficiency cooling for long-lasting comfort and energy savings.

Gas Furnace provides reliable, high-efficiency heating for long-lasting comfort and energy savings.

Evaporator Coil is matched with the proper outdoor unit to provide top heating and cooling efficiency and years of reliable service.

Air Cleaner improves air quality by removing harmful and irritating airborne pollutants in your home.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

Humidifier replenishes moisture to dry air.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

UV Lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Programmable Thermostat allows precise temperature control along with programmable features to further customize your comfort.
